

## Metering Valve

# MPV-01 Metering Plunger Valve

Data Sheet

### Features

Small & vertical type of DV-300. Good for installing to multi-head.

### Applicable Material

Low~ medium viscosity material.

### Dimension

25 x 121 mm (0.98 x 4.76 in)

### Weight

281g

### Driving Air Pressure

> 0.5 MPa (72.52 psi)

### Material Feeding Pressure

Max. 3 MPa (453.11 psi)

### Shot Volume

0.005 cc

### Driving Part Material

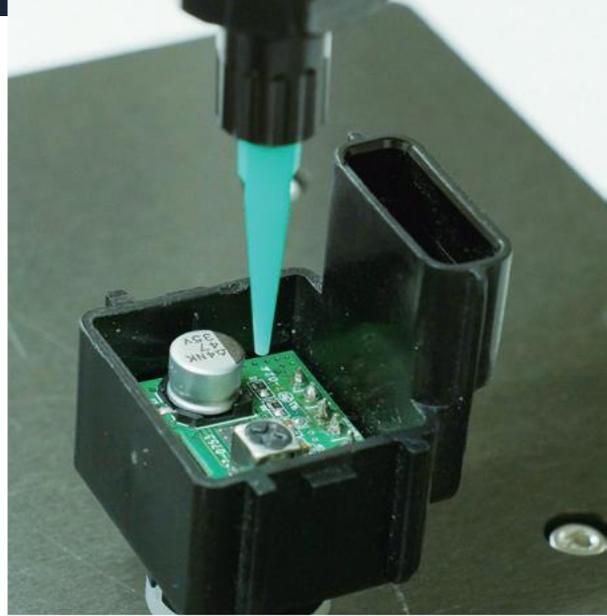

Aluminum

### Wetted Part Material

SUS303

TAEHA's Pneumatic metering valves are widely used in various industries to provide reliable and accurate dispensing solutions. From low-viscosity materials to high-viscosity materials that are difficult to dispense, we have a lineup of valves that can dispense accurately and consistently.

Excellent product quality control by owning a dedicated facility that processes and produces valve precision parts.

### Benefits:

- Fast open and close.
- Suitable with numerous materials.
- Can be used in automation with very low payload capacity.
